

Guantanamo Bay Gazette

Sailors and volunteers conduct a CSAAD hosted cleanup and restoration project at NS Guantanamo Bay's "Our Lady of Cobre" monument, Mar. 2. The volunteers cleaned and re-painted the site, which serves as a religious shrine for the base's Cuban Catholic community. The 400th anniversary of "Our Lady of Cobre's" existence will be celebrated later this month.

CSAAD Sailors And Volunteers Restore Historic GTMO Site

MC2(SW/AW) Justin Alles

Gazette Editor

Coalition Sailors Against Destructive Decisions (CSAAD) at Naval Station (NS) Guantanamo Bay, hosted a volunteer cleanup and restoration project at the installation's "Our Lady of Cobre" monument, Mar. 2.

Eight volunteer service members cleaned and repainted the site, which serves as a religious shrine for the base's Cuban Catholic community.

"It is imperative to offer a wide selection of volunteer projects that benefit the local community and to present a positive outlet for Sailors," said Religious Programs Specialist 2nd Class Sandra Hosier, volunteer event coordinator and CSADD Secretary. "This project was vital to the Catholic community who will celebrate the 400th anniversary of Our Lady of Cobre's existence later this month, and base Chapel services will rededicate and bless the historical site."

Our Lady of Cobre also known as Our Lady of Charity is the patroness of Cuba. The original shrine was built in 1926 and is situated in village El Cobre, near Santiago de Cuba, Cuba.

"The experience was heartwarming in so many ways," said Hosier. "In addition, volunteer work is one of the many aspects of being a well rounded Sailor. It is crucial that Sailors continue to volunteer their time to places of need. Even though we are at an isolated command, there are still plenty of volunteer opportunities."

Accompanying Hosier, Religious Programs Specialist 2nd Class Vanessa Rocha, Surface Sonar Technician 3rd Class Erin Phillips, Logistics Specialist 2nd Class Oluwadamilare Ogunlade, Logistics Specialist Seaman Dominique Williams, Interior Communications Electrician 1st Class Rodney Washington, Aviation Electronics Technician 2nd Class Maurice Shuron, and Master-at-Arms 2nd Class Rodolfo Gallardo assisted in the cleanup project.

Safety Department Host Motorcycle Safety Course

MC2(SW/AW) Justin Ailes

Gazette Editor

The Safety department at Naval Station (NS) Guantanamo Bay, hosted an experienced rider and basic safety course for motorcycle enthusiasts at the installation's McCalla Hill airfield, Mar. 8.

In accordance with the U.S. Navy Traffic Safety Program (OPNAVINST. 5100.12H) and Department of Defense Instruction (DoDI 6055.04), the purpose of the motorcycle safety training program is to provide motorcycle operators with safe riding skills, knowledge, and techniques.

"This course keeps riders current on motorcyclist guidelines as well as military safety policies, and knocks off some 'rust,'" said NS Guantanamo Bay Safety Manager Joseph Perfetto. "The course outlines requirements for proper personal protective equipment (PPE) and operator training when riding a motorcycle on base."

Active duty service members are subject to OPNAVINST 5100.12H at all times on or off a military installation. All other motorcyclists and their passengers who come aboard a military installation must also follow the instruction. The instruction requires that certain PPE be worn, to include "Dot" or "Snell" approved helmets, long trousers, long sleeved shirts, reflective vests or jackets, full finger gloves, hard-soled shoes with heels that protect the ankle, and protective eyewear.

"This event reaffirms my safety awareness when riding, and lets me know that other riders are confident on the road," said safety course participant Steven Bott.

All military personnel who operate a motorcycle on or off base, and all DoD civilian personnel who operate a motorcycle on base are required to complete the motorcycle rider safety course before operating these vehicles.

Motorcycle Safety Course participant Steven Bott and base motorcyclists navigate turns during at the Safety department's training program, Mar. 8. The course, which took place at McCalla Hill airfield, provided motorcycle operators with safe riding skills and techniques.

NAVAL STATION GUANTANAMO BAY, CUBA

Sailors React To SECNAV's 21st Century Sailor, Marine Initiative

MC2(SW/AW) William Jamieson

Navy Public Affairs Support Element, East

The secretary of the Navy held an All Hands call on board USS Bataan (LHD 5) which was televised and streamed live on the web to the fleet March 5, announcing the establishment of the 21st Century Sailor and Marine initiative.

Secretary Ray Mabus explained that the initiative consolidates a set of objectives and policies, new and existing, to maximize Sailor and Marine personal readiness. The programs are divided into five categories or areas; readiness, safety, physical fitness, inclusion, and continuum of service.

"The new defense strategy will put increased responsibilities on the Navy and Marine Corps in the years to come," the secretary said. "You are the department's most essential asset, and it is the duty of the department's leadership to do all we can to provide each individual Sailor and Marine with the resources to maintain that resiliency."

For Sailors in attendance, the message was clear. Logistics Specialist 2nd Class Jessica Vestal from Bataan said she left the All Hands call feeling excited for the future of the Navy.

"I thought the new initiatives really show how far the Navy has come," said Vestal. "We, as Sailors, need all the support we can get, and I feel like I heard a lot today that will have a real deckplate impact."

Various programs fall under the readiness area, all of which help ensure we have the most mentally prepared service members and family in department history. Continued emphasis on the responsible use of alcohol, zero tolerance for drug use, suicide reduction, family and personal preparedness, and financial and family stability all work together to prepare Sailors, Marines and their families for the challenges that they may face and reinforce healthy alternatives on liberty or off-duty. A new initiative will include breathalyzer tests when Sailors stationed onboard ships, submarines and at squadrons report for duty and randomly elsewhere to reduce the occurrence of alcohol related incidents that can end careers and sometimes end lives.

Gas Turbine Systems Technician 2nd Class Eric Smith from As-

sault Craft Unit 4 said the new initiatives were a welcome continuation of policies already in place.

"We have been moving towards a cleaner, smarter Navy, and I would tell my guys that this is just one more step towards that goal," said Smith. "If you aren't right, now is definitely the time to get right."

In addition to ensuring the readiness of our Sailors and Marines, the initiative will aim to make the Navy and Marine Corps the safest and most secure force in the department's history. All personnel in the fleet should expect to work in a safe environment, free from harassment or hazards, and when confronted with these, have the resources available to immediately correct the problem.

"I was very encouraged to see the Navy and Marine Corps taking the lead on sexual assault prevention" said Vestal. "I've long been an advocate for the program and I think it's very encouraging that the Sailors coming in to the navy will find it to be a great working environment."

While each of the five areas provide important support for department personnel, physical fitness can be viewed having some of the farthest reaching beneficial effects. Sailors and Marines must be ready to meet the demands of performing in a tactical environment, and physical readiness is a crucial link to ensuring Sailors and Marines are ready to take on the challenges the Navy and Marine Corps faces today, and will face in the future.

Ensuring all personnel, regardless of race or gender, are given every opportunity to excel and succeed is the hallmark of the program's forth area, inclusion. In order to operate globally, the Department of the Navy will need diversity of ideas, experiences, areas of expertise, and backgrounds to fulfill a variety of missions, while remaining relevant to the American people.

A new DoN Diversity Office will be established, with the Assistant Secretary of the Navy (Manpower and Reserve Affairs) serving as the DoN's diversity officer. The Diversity Office will leverage, coordinate and formalize ongoing efforts within the Navy and Marine Corps and will include the heads of the Navy Office of Diversity and Inclusion, Marine Corps Office of Equal Opportunity and Diversity Management and the DoN Office of Civilian Diversity as team members.

The final area, continuum of service, aims at ensuring Sailors and Marines are provided the most robust transition support in Department history. Whether retraining wounded warriors, providing voluntary education, or helping achieve civilian credentialing, the department will aim to provide personnel every opportunity for personal and professional growth.

Chaplain's Corner

Haste Makes Waste

Chaplain Tung Tran

NS Guantanamo Bay, Cuba Chapel Services

A few weeks ago, I wrote about patience. Yes, it's something that we all need. I was told that there is a senior chaplain at a certain Naval base who regularly does physical training with Sailors, most of whom are quite a few years younger than him. At PT, when the group has a distance run, the chaplain would plan and set his pace. And so at the beginning of the run, he would let all the young Sailors sprint or run ahead of him or let others pass him knowing that he would eventually overtake them. And sure enough, from the middle of the run toward the end, he would pass one tired Sailor and then another

exhausted shipmate, and another teammate who would be worn out and panting and gasping for air. How does this happen? Aren't young Sailors strong and fit? And don't they have stamina, especially the ones that have been in the Navy for some time and have been training regularly? Yes, but there are other things that are very important. Wisdom is one of them. And wisdom tells that chaplain to be patient, to be smart and to remember that "haste makes waste."

I recall a story in which a student of Morihei Ueshiba, founder of the martial art of Aikido, asked how long it would take a beginner to obtain a black belt. The master said, "Ten years." The student then asked, "What if I practiced twice as hard and twice the amount of time? The teacher then said, "Twenty years." There are certain things that require patience and perseverance. Hang on folks.

Morale, Welfare and Recreation (MWR) at Naval Station (NS) Guantanamo Bay, hosted drum and dance group "Rhythm Extreme" at the installation's downtown Lyceum, Mar. 3.

The performance featured created rhythm through dancing, singing, and creative drumming utilizing rubber trash cans, plastic buckets, and the stage itself.

"I'm so proud of our MWR team for finding such a diverse and excit-

ing line-up of live entertainment, and this was a great example of that variety," said NS Guantanamo Bay MWR Director Tara Culbertson. "This was a heart pounding, fun show that appealed to all ages. I was thrilled to see how both the adults and the families enjoyed it. I think everyone enjoyed the crowd participation and the opportunity to get on stage to join in the fun. MWR works hard to provide things that are new and different and I think this show was a big win."

Styled after the worldwide theatrical production "Stomp," Rhythm

Extreme incorporates innovative percussion performances to create a theatrical event. During the performance, some audience members were invited on-stage to try their hand at drumming on a variety of objects.

"Rhythm Extreme brought energy and excitement through a musical form rarely seen in GTMO," said NS Guantanamo Bay MWR Marketing Coordinator Brittany Hanna. "It's important to host unique entertainment because it keeps up base morale and it shows that MWR is listening to patron input."

Percussion and dance group "Rhythm Extreme" showcase creative drumming for community members during their performance at the downtown Lyceum, Mar. 3.

UNITED STATES NAVAL HOSPITAL DID-YA-KNOW

USNH Guantanamo Bay Focuses On Patient Safety

Stacey Byington

USNH Guantanamo Bay Public Affairs Officer

National Patient Safety Awareness Week is taking place March 4 – 10. U.S. Naval Hospital Guantanamo Bay (USNH GTMO) has been promoting patient safety education and awareness throughout the week in the hospital's Primary Care Clinic.

"The annual campaign, led by the National Patient Safety Foundation, encourages patients to become involved, recognize the importance of patient safety and the range of efforts to improve health safety in the United States and worldwide," said Sandra McMurray, USNH GTMO's Patient Safety Manager. "Throughout the week of March 4 – 10, members of the healthcare team had displays set up in the Primary Care Clinic and in other areas of the hospital, and were available to answer patient questions."

The 2012 patient awareness campaign slogan is "Be Aware for Safe Care."

The intent is to involve everyone – patients, healthcare providers, and the general public – to becoming more aware of the ways each one can participate and partner to improve patient safety efforts.

"Patient safety impacts everyone," said McMurray. "The more we work together to promote patient safety, the more we benefit from a safe healthcare system."

CAPT Richard Stoltz, Commanding Officer of USNH GTMO, kicked off the week-long event at the hospital helping to cut a cake and announcing the

winners of the hospital safety poster contest.

"It is important that we do the right thing for our patients," said Stoltz. "All of you (hospital staff) go the extra mile to keep our patients safe."

The winners of the best patient safety poster was the Multi-Service Ward of the hospital.

"I am so pleased about the response we got to the poster contest," said McMurray. "Everyone did an excellent job. We had a hard time determining the winner."

Infection prevention is one of the major concerns relating to patient safety. One way to alleviate the spread of infection is by hand-washing. Our healthcare providers call this the "healthcare handshake."

Throughout the week patients seen at the hospital were given a card asking if they "received their healthcare handshake", meaning did they witness their healthcare provider wash his or her hands before and after treatment. Patients were asked to answer the questions on the card and deposit it in one of the boxes provided for the purpose, or turn the card in at the Primary Care check-in window.

"Here at USNH GTMO we encourage patients to empower themselves and ask questions about their care, to educate themselves about their treatment," added McMurray. "We want them to be part of the solution. Now, more than ever in healthcare, a focus on empowering patients and strengthening patient-provider communications are seen as paramount to reducing errors. We all need to Be Aware for Safe Care."

Patient safety impacts everyone. March 4-10 is National Patient Safety Awareness Week, and members of U.S. Naval Hospital Guantanamo Bay's Multi-Service Ward show off their winning Patient Safety poster. Throughout the week hospital personnel have been promoting patient safety education and awareness. Pictured (L-R) are HM3(AW) Miguel Mejiacontreras, Sandra McMurray (USNH GTMO Patient Safety Manager), CAPT Richard Stoltz (Commanding Officer USNH GTMO), LCDR Kristina Oliver, HA Nathan Warren, HA Darius Cosby and HA Leslie Jo. Numerous departments and clinics participated in the poster contest, and the competition was fierce. All the posters are on display along the hospital corridors. The prize for the best poster is a pizza party for the entire winning team. - U.S. Navy Photo by Stacey Byington

GTMO Port Ops Personnel Conduct SimBBC Program

MC2(SW/AW) Justin Ailes

Gazette Editor

Five Sailors attached to Naval Station (NS) Guantanamo Bay, Cuba's Port Operations department participated in the Shore Installation Management Basic Boat Coxswain (SimBBC) program Mar. 5-9.

In accordance with Commander Navy Installations Command (CNIC) instruction 3500.1, the course was held to qualify Sailors as small boat Coxswain's.

"A coxswain is the person overall in charge of safety, and the well-being of crew, vessel and passengers," said Boatswain's Mate 2nd Class Jason Mickel, SimBBC program instructor. "We are teaching Sailors proper anchoring techniques, conducting man over-board drills, and facilitating towing astern and towing along-side procedures."

The SimBBC course provides a standardized shore installation management program for the train-

ing and qualifying of basic boat Coxswain's and crewmembers.

"After completion of this course, members will obtain advanced knowledge in basic seamanship, fundamentals of basic navigation, and proper boat etiquette," said Mickel. "Overall, the course gives Port Ops personnel a refresher of basic fundamentals while training them to be a coxswain and crew member, responsible for safe navigation."

BM2 Jason Mickel demonstrates proper anchoring techniques during hands-on training as part of Port Ops SimBBC program which qualifies Sailors as small boat Coxswain's, Mar. 8
